TOC Direct Outline-Level Sources

The first TOC omits directly applied outline levels. The second adds the \u switch and therefore includes the gold Normal paragraph below.

Without \u: style-defined heading only

Styled heading.....1

With \u: direct outline plus style-defined heading

Direct outline paragraph.....1
Styled heading.....1

Direct outline paragraph

Styled heading

Expected: both cached TOCs stay visibly distinct; regenerating the first must not add the gold paragraph, while the second must retain it.
